

## **Sherry Kappel Wins Innovative Thought Leader of the Year Award at ILTACON 2017**

**MCLEANSVILLE, North Carolina – August 23, 2017** – Litera Corp, a global leader in creating collaborative document lifecycle solutions for professionals worldwide, is proud to congratulate Sherry Kappel, Chief Consultant at Litera, for winning ILTA's prestigious [Innovative Thought Leader of the Year Award](#) during ILTACON 2017.

Kappel's work creating momentum for new technologies in the legal industry has earned her this well-deserved recognition. Her thought leadership and hands-on expertise in the implementation, planning and development within Office 365 has taken uncertainty out of the Cloud for law firms around the world, empowering lawyers with the freedom to work anywhere, productively and securely, with confidence.

Sherry Kappel commented, "While truly honored to receive this award, I see this achievement as further acknowledgement of Litéra's core culture for innovation and collaboration. Our founder, the late Deepak Massand, received this award in 2014 the same night I was named Innovative Consultant of the Year. For me, winning this award is, yes, a hat-tip to his legacy, but also a call to action for innovators across legal technology to step out and make your good works known." continued Kappel. "You don't have to be CEO to be considered, or to win."

"I must also salute ILTA for fostering collaboration across this entire community. Through its annual conference, various symposium sessions and these awards, ILTA makes visible the innovative efforts of professionals at work in legal technology. Together, we'll see today's emerging technologies address the needs of firms around the world."

### **About Litera Corp**

Litera delivers integrated solutions for document lifecycle management through a comprehensive suite of patented creation, collaboration, and control technologies. With platform agnostic and cloud savvy solutions, Litera empowers you to generate, review and distribute quality content quickly and securely, from any device anywhere.
